RECYCLED WASTE (VOLUME 1)

RETROSPECTIVE ALBUM / 28 AUG 2024 / DIGITAL

Recycled Waste (Volume 1) gathers four extended electronic pieces from abandoned project stages. Originally released on 28 August 2024 under AMbrosia, the album now appears as an archive title within the AMSGN catalogue – not as a leftover, but as a deliberately framed long-form release.

01 / RELEASE FACTS

ORIGINAL COVER / 2024

ARTIST / PROJECT	AMSGN
ORIGINAL RELEASE	AMbrosia (2024)
TITLE	Recycled Waste (Volume 1)
RELEASE DATE	28 August 2024
FORMAT	Album · Digital · Self-released
LENGTH	4 tracks · 63:03
BASED IN	Bitburg / Eifel / Germany

ALEXANDER MOELL

AMSGN / ARTIST

02 / SONIC LANGUAGE

The album moves between ambient, Berlin School, cinematic electronics and long-form electronica. Its pieces unfold through slow development, spacious textures, sequenced impulses and a deliberate tension between sketch-like origins and finished form.

TRACKS & CONTEXT

RECYCLED WASTE (VOLUME 1) / RELEASE EPK / 2024

01 / TRACKLIST

01	recycled waste part I	13:31
02	recycled waste part II	15:44
03	recycled waste part III	21:25
04	recycled waste part IV	12:23

63:03 / 4 TRACKS

02 / CONCEPT & CONTEXT

Not every rejected draft is musical waste. Recycled Waste (Volume 1) turns that in-between zone into its core concept: material that did not fit other projects is not deleted, but given a second life as a release in its own right. Instead of narrative song titles, the four pieces are simply named part I to part IV, directing attention towards form, movement and sound.

03 / PRESS & ARCHIVE POSITION

As the middle of three AMbrosia releases in 2024, the album sits between Route Gottfried von Bouillon and Miklihvellur. A later retrospective note at **BetreutesProggen** highlighted precisely this archival quality: material originally set aside, but ultimately considered worthy of release.
